HPE IT Relocation Services

Minimize the risk of relocating to another data center

Whether you are building a new data center, consolidating facilities or just reallocating equipment, eventually IT assets need to be moved. However, it is not something you do very often, and your staff may not have the experience, expertise or time to plan and execute a complex relocation with minimum disruption to normal operations.

HPE can help you avoid pitfalls that can cause an unacceptable amount of downtime. We have managed relocations for thousands of customers—from single systems to large data centers, standard to sensitive or mission-critical environments—and we have done it for ourselves, notably during our consolidation of 84 worldwide data centers into six new facilities. We have a proven approach that has been fine-tuned with time and experience, top-notch project managers, expert technical resources, and an insured equipment moving service.

One vendor, one price, one contract

HPE IT Relocation Services provides a single point of contact and management for every move-related task—from project planning and site surveys to re-installation and testing. Since each situation is different, you get a Statement of Work (SOW) customized to meet your specific requirements and covering the components shown below for all HP hardware and software products, plus hardware from other vendors.

Site evaluation	IT environment, power factors, site logistics, ventilation and cooling, network topology conflicts, timetables and reporting.
Relocation planning	Assigned project manager, detailed statement of work, detailed project plan, coordination of all manpower and activities.
Transportation	Bonded IT equipment movers, preparation of items for shipment, supervision of packing and unpacking, loading and shipment of equipment.
De-installation	All identified equipment properly de-installed and prepared for transport.
Re-installation	Unpacking and positioning of equipment, re-installation and connection of cables and network links, system diagnostics and status reporting.
Damage coverage	For equipment damaged in relocations within the U.S., with HP making all necessary contacts and managing priority-one claims resolution.
